Caution Regarding Forward Looking Information

Certain portions of this report, including, but not limited to, “Results of Operations” and “Recent Developments”, may contain forward-looking statements including, but not limited to, statements about the Fund, its strategy, risks, expected performance and condition. Forward-looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as “anticipates”, “believes”, “estimates”, “expects”, “intends”, “plans”, “may”, or future or conditional verbs such as “will”, “should”, “would” and “could”, and similar forward-looking expressions or negative versions thereof. In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement.

Forward-looking statements are based on current expectations and projections about future general economic, political and relevant market factors, such as interest rates, foreign exchange rates, equity and capital markets, and the general economic and business environment, in each case assuming no material changes to applicable tax or other laws, government regulations, or policies.

By their very nature, forward-looking statements involve numerous assumptions and are subject to inherent risks and uncertainties, which give rise to the possibility that the Fund’s predictions, forecasts, projections, expectations and conclusions will not prove to be accurate, and that its assumptions may not be correct.

Forward-looking statements are not guarantees of future performance, and actual events could differ materially from those expressed or implied in any forward-looking statements made by the Fund. A variety of factors, many of which are beyond the Fund’s control, may cause actual results to differ materially from the expectations expressed in the forward-looking statements. These factors include, but are not limited to, general economic, political and relevant market factors in North America and internationally, interest and foreign exchange rates, equity and capital markets, business competition, technological change, changes in government relations, unexpected judicial or regulatory proceedings and catastrophic events, and other risks described in the Fund’s current simplified prospectus. The above-mentioned list of important factors is not exhaustive.

Before making any investment decisions, investors and others relying on forward-looking statements should carefully consider the foregoing factors and the uncertainties and risks they contain. We caution readers not to place undue reliance on these forward-looking statements.

Forward-looking statements are issued in good faith and may be modified without notice. We assume no obligation to update forward-looking statements in the light of new information, future events or other circumstances unless applicable legislation so requires.

MANAGEMENT DISCUSSION OF FUND PERFORMANCE

Results of Operations

In the first six months of 2019 (the “period”), the CWB Onyx Canadian Equity Fund’s (the “Fund”) net assets increased by \$2,474,742 to \$38,014,613. This reflects an increase of \$4,756,836 from investment performance, distributions to shareholders of \$610,329, and net withdrawals of \$1,671,765.

Series A of the Fund returned 12.3% over the period versus the Fund’s benchmark, the S&P/TSX Composite Total Return (TR) Index¹, which returned 16.22% over the period. Unlike the benchmark, the Fund’s return is calculated after the deduction of fees and expenses. Returns for other series of the Fund may vary, largely due to differences in fees and expenses.

The Canadian economy continued to grow steadily in the first six month of 2019 as unemployment remained low. Canadian equity markets rebounded to new highs during the period. Sectors benefitting from improving economic conditions were overshadowed by gains in the Health Care sector, primarily resulting from cannabis related stocks, as the sector gained just over 35% during the period, hurting the Fund’s relative performance against the benchmark.

The Fund continued to be conservatively positioned, over-weighted in defensive sectors such as Consumer Staples, Utilities and Communication Services. Stock selection within the Information Technology sector was the primary detractor from relative performance during the period. In particular, Shopify’s stock price more than doubled in value over the period and accounted for the majority of the underperformance within the Information Technology sector as it is not held within the Fund. Stock selection in the Energy sector focused primarily on larger, stable companies that are able to navigate the difficult energy market in Western Canada, increasing the performance of the Fund.

Recent Developments

Market Developments

The first six months of the year saw both positive and negative global trade developments with implications for Canada. On the positive side, the United States-Mexico-Canada Agreement is closer to ratification, as the contentious tariffs on steel and aluminum were lifted in May. However, the U.S. and China are locked in a major trade war which threatens to lower global economic growth. Despite the Alberta government ending the oil production curtailments, pipeline capacity remains an issue. An increase in oil prices by nearly 30% over the period has helped offset capacity constraints.

Despite economic uncertainties, the Canadian economy has remained resilient throughout the period. While expectations for Canadian growth continue to moderate, the Bank of Canada remains cautious citing ongoing geopolitical uncertainties worldwide, including the U.S. trade war. Given this, the Canadian yield curve has inverted, an indicator of a possible recession in the next 6-18 months from the time of inversion. Despite the Bank of Canada’s outlook for the economy and the inversion of the curve, the market does not expect the Bank to cut rates until the end of the year, which indicates that the Bank does not see a recession on the horizon. This should be neutral to positive for Canadian Equities.

Related Party Transactions

CWB Wealth Management Ltd. (“CWB WM” or “we”) serves as trustee, manager, portfolio advisor, and principal distributor of the Fund. The Fund pays CWB WM a management fee as compensation for its services. Refer to the section titled ‘Management Fees’ for a summary of fees paid to CWB WM.

CWB McLean & Partners Wealth Management Ltd. (“CWB M&P”) acts as a sub-advisor to the Fund. CWB M&P is a subsidiary of CWB WM. As a sub-advisor, CWB M&P is paid a fee for their services. This fee is paid by the Manager directly and does not increase the management fees paid by the Fund.

The CWB Onyx Managed Solution Funds, comprised of the CWB Onyx Conservative Solution, CWB Onyx Balanced Solution and the CWB Onyx Growth Solution, invest in Series O units of the Fund. As at June 30, 2019, 26.1% of the Series O units of the Fund are held by the CWB Onyx Balanced Solution, 19.2% of the Series O units of the Fund are held by the CWB Onyx Growth Solution, and 1.9% of the Series O units of the Fund are held by the CWB Onyx Conservative Solution

CWB WM is party to a participating dealer agreement (the “Dealer Agreement”) with Canadian Western Financial Ltd. (“CWF”), a subsidiary of CWB WM. Pursuant to the Dealer Agreement, CWB WM pays CWF a monthly trailing commission equal to 1/12th of 1% of the net asset value attributable to units of the Fund held by CWF clients. This trailing commission is paid directly by CWB WM and does not increase the management fee paid to CWB WM by the Fund.

- 1 This information is derived from the Fund's unaudited interim or audited annual financial statements (as applicable). All figures presented are prepared in accordance with IFRS, which requires the Fund to measure the fair value of its investments based on close market prices, where the close market price falls within the bid-ask spread, which is consistent with the method used in measuring the net asset value for transactions with unitholders.
- 2 Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the financial period.
- 3 Distributions were paid in cash, reinvested in additional units of the Fund or both.

* Data reported represents results from the commencement of operations to December 31 of the year indicated.

- 1 This information is provided as at December 31 of the year shown unless otherwise stated.
- 2 Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period.
- 3 The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.
- 4 The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

Management Fees

The Fund pays CWB WM an annual management fee of 1.80% of the net asset value of Series A units of the Fund.

The management fee for each applicable series is calculated and accrued daily as a percentage of its NAV. The Fund's management fees were used by CWB WM to pay for the cost of managing the investment portfolio, providing investment analysis and recommendations, making investment decisions, making brokerage arrangements for the purchase and sales of investment portfolio, providing other services, and compensating CWB WM for acting as the trustee of the Fund. CWB WM also used the management fee to fund trailing commissions and any other compensation to CWF whose clients invest in the Fund. A further breakdown of the management fee is not available for the interim period.

Series O management fee is negotiated and paid directly by each investor. Series O management fee is not to exceed the Series A management and advisory fee of the Fund.

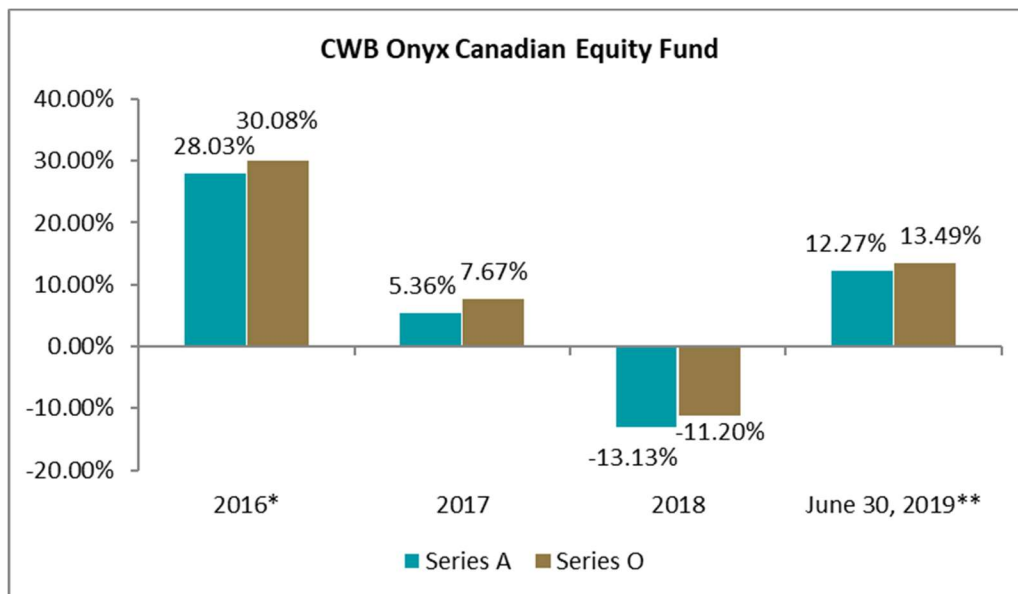

PAST PERFORMANCE

The past performance of the Fund is set out in the following chart. The performance information assumes that all distributions made by the Fund in the periods shown were reinvested in additional securities of the Fund. The performance information does not take into account sales, redemptions, distributions or other optional charges that would have reduced returns or performance.

Mutual fund returns are not guaranteed. Please note that past performance is not indicative of future performance.

Year-by-Year Returns

The following bar chart shows the Fund's annual performance for each of the past three years and for the six month period ending June 30, 2019, and illustrates how the Fund's performance has changed from year to year. The chart shows, in percentage terms, how an investment made on January 1 would have increased or decreased by the last day of the fiscal period presented.

* Return from February 10, 2016 (commencement of operations) to December 31, 2016.

**Return from January 1, 2019 to June 30, 2019 not annualized.
