## Caution Regarding Forward Looking Information

This report, may contain forward-looking statements, including, but not limited to, statements about the Fund, its strategy, risks, expected performance and condition. Forward-looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as “anticipates”, “believes”, “estimates”, “expects”, “intends”, “plans”, “may”, or future or conditional verbs such as “will”, “should”, “would” and “could”, and similar forward-looking expressions or negative versions thereof. In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement.

Forward-looking statements are based on current expectations and projections about future general economic, political and relevant market factors, such as interest rates, foreign exchange rates, equity and capital markets, and the general economic and business environment, in each case assuming no material changes to applicable tax or other laws, government regulations, or policies.

By their very nature, forward-looking statements involve numerous assumptions and are subject to inherent risks and uncertainties, which give rise to the possibility that the Fund’s predictions, forecasts, projections, expectations and conclusions will not prove to be accurate, and that its assumptions may not be correct.

Forward-looking statements are not guarantees of future performance, and actual events could differ materially from those expressed or implied in any forward-looking statements made by the Fund. A variety of factors, many of which are beyond the Fund’s control, may cause actual results to differ materially from the expectations expressed in the forward-looking statements. These factors include, but are not limited to, general economic, political and relevant market factors in North America and internationally, interest and foreign exchange rates, equity and capital markets, business competition, technological change, changes in government relations, unexpected judicial or regulatory proceedings and catastrophic events, including natural disasters, pandemics, war and other risks described in the Fund’s current simplified prospectus. The above-mentioned list of important factors is not exhaustive.

Before making any investment decisions, investors and others relying on forward-looking statements should carefully consider the foregoing factors and the uncertainties and risks they contain. We caution readers not to place undue reliance on these forward-looking statements.

Forward-looking statements are issued in good faith and may be modified without notice. We assume no obligation to update forward-looking statements in the light of new information, future events or other circumstances unless applicable legislation so requires.

# Management Discussion of the Performance of the CWB Onyx Canadian Equity Fund

## Investment Objectives and Strategies

The investment objective of the CWB Onyx Canadian Equity Fund (the “Fund”) is to achieve long-term capital appreciation by investing in a diversified portfolio of publicly traded Canadian equity securities.

We target an allocation of 98% in Canadian equity securities, real estate investment trusts and similar investment vehicles. We target an allocation of 2% in Canadian bonds or cash and short-term investments, under normal market conditions. The Fund will not invest in foreign securities.

## Risks

No changes to the Fund affecting the Fund’s overall level of risk were made during the 12-month period ended December 31, 2022 (the “Period”). The risks of investing in the Fund and the suitability of the Fund for investors remain as discussed in the Fund’s most recent simplified prospectus or any amendments or fund facts.

## Results of Operations

Over the Period, the Fund’s net assets decreased by \$6,950,206 to \$64,948,649. This reflects a decrease in net assets of \$1,159,769 resulting from investment performance (net of expenses), distributions to unitholders of \$4,430,117, and net unit withdrawals of \$1,360,320.

Series A of the Fund returned (4.24%) over the Period versus (5.84%) for the Fund’s internal benchmark (the “Fund Benchmark”), the S&P/TSX Composite Total Return (TR) Index over the Period. Unlike the Fund Benchmark, the Fund’s return is calculated after the deduction of fees and expenses. Returns for Series O of the Fund may vary, largely due to differences in fees and expenses.

The period marked the return to a more normal environment for Canadians as pandemic restrictions were largely lifted. High levels of inflation experienced in 2021 proved to be more persistent than expected causing the Bank of Canada to aggressively raise rates in response. Despite strong economic growth in 2022, higher interest rates and inflation raised concerns of an imminent recession causing volatility in equity markets.

The Canadian equity market, as measured by the S&P/TSX Composite, was one of the best performing markets in the world despite falling 5.84% in 2022. Canada’s stock market benefited from strong oil and natural gas pricing. The Energy sector is the second largest sector in the S&P/TSX.

The Fund’s relative performance was aided by an underexposure to the Information Technology sector and Shopify in particular. Technology stocks performed well during the pandemic but experienced headwinds as interest rates rose, and the economy opened back up. An over-allocation to the Industrial sector versus the benchmark was a positive contributor to relative performance. Industrial holdings such as CP Rail, Waste Connections and Boyd Services Group demonstrated the ability to increase pricing to pass along inflationary costs and maintain their margins. Although energy stocks such as Canadian Natural Resources and Suncor Energy were some of the best performers in the Fund over the Period, an overall underexposure versus the benchmark hurt relative returns.

## Recent Developments

Notwithstanding the overall results in 2022, the fourth quarter of the year was a positive one. The hope that interest rate increases were coming to an end, and that there may be rate relief in 2023 seemed to take hold, buoying stock prices. Inflation data will be key in 2023, as the Bank of Canada has reiterated that it will continue to raise interest rates if needed. Whether a soft landing (no recession) can be engineered remains to be seen, as we have not yet felt the full effects of 2022 rate increases on the economy. Either way economic growth is expected to slow in 2023 from 2022 levels which will impact corporate earnings growth and could limit equity market returns. In such an environment, quality companies with balance sheet strength to absorb higher rates as well as pricing power appear to be well positioned.

## Related Party Transactions

CWB WM is the trustee, manager, portfolio advisor, and principal distributor of the Fund. The Fund pays CWB WM a management fee as compensation for its services. Refer to the section titled 'Management Fees' for a summary of fees paid to CWB WM.

Until April 1, 2022, CWB Wealth Partners ("CWB WP") acted as a sub-advisor to the Fund. CWB WP is a subsidiary of CWB WM. As a sub-advisor, CWB WP was paid a fee for their services. This fee is paid by the Manager directly and does not increase the management fees paid by the Fund.

The CWB Onyx Managed Solution funds, comprised of the CWB Onyx Conservative Solution, the CWB Onyx Balanced Solution and the CWB Onyx Growth Solution, invests in Series O units of the Fund. As at December 31, 2022, 1.48% of the Series O units of the Fund are held by the CWB Onyx Conservative Solution, 14.18% of the Series O units of the Fund are held by the CWB Onyx Balanced Solution, and 12.50% of the Series O units of the Fund are held by the CWB Onyx Growth Solution.

CWB WM is party to a participating dealer agreement (the "Dealer Agreement") with Canadian Western Financial Ltd. ("CWF"), a subsidiary of CWB WM. Pursuant to the Dealer Agreement, CWB WM pays CWF a monthly trailing commission equal to 1/12th of 1.00% of the net asset value attributable to units of the Fund held by CWF clients. This trailing commission is paid directly by CWB WM and does not increase the management fee paid to CWB WM by the Fund.

<sup>1</sup> This information is derived from the Fund's audited annual financial statements. All figures presented are prepared in accordance with IFRS, which requires the Fund to measure the fair value of its investments based on close market prices, where the close market price falls between the bid-ask spread, which is consistent with the method used in measuring the net asset value for transactions with unitholders.

<sup>2</sup> Total investment income is comprised of dividends, realized gains on sale of investments, changes in unrealized appreciation (depreciation) in value of investments and interest income. Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the financial period.

<sup>3</sup> Distributions were paid in cash, reinvested in additional units of the Fund or both.

Net asset value per unit	\$14.21	\$15.55	\$12.93	\$13.25	\$11.47

<sup>1</sup> This information is provided as at December 31 of the year shown unless otherwise stated.

<sup>2</sup> Management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period. The management fees related to Series O are excluded as the payments are made directly to the Manager and not through the Fund.

<sup>3</sup> The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.

<sup>4</sup> The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

## Management Fees

The management fee for each applicable series is calculated and accrued daily as a percentage of NAV. The annual management fees and a breakdown of the services received in consideration of the management fees, as a percentage of the management fees, for each series are as follows:

Fund	Management Fee (% of NAV)	Distribution Costs (% of Management Fee)	Others* (% of Management Fee)
Onyx Canadian Equity Fund – Series A	1.80	42.82	57.18
Onyx Canadian Equity Fund – Series O	N/A	N/A	N/A

\* Includes investment advisory fees, administration fees, and other operating fees

The Fund's management fees were used by CWB WM to pay for the cost of managing the investment portfolio, providing investment analysis and recommendations, making investment decisions, making brokerage arrangements for the purchase and sales of investment portfolio, providing other services, and compensating CWB WM for acting as trustee of the Fund. CWB WM also used the management fee to fund trailing commissions and any other compensation to CWF whose clients invest in the Fund.

The Series O management fee is negotiated and paid directly by each investor and will not exceed the Series A management fee.

## Past Performance

The past performance of the Fund is set out in the following charts. The performance information shown assumes that all distributions made by the Fund in the years shown were reinvested in additional securities of the Fund and would be lower if distributions were not reinvested. The performance information does not take into account sales, redemption, distribution, or other optional charges, or income taxes payable that would have reduced returns or performance.

Mutual fund returns are not guaranteed. Please note that past performance is not indicative of future performance.

## Year-by-Year Returns

The following bar chart shows the Fund’s annual performance in each of the past 6 years and illustrates how the Fund’s performance has changed from year to year. The chart below shows, in percentage terms, how an investment made on January 1 would have increased or decreased by the last day of the fiscal year presented.

\*Return from February 10, 2016 (commencement of operations) to December 31, 2016, not annualized.
